

TREATMENT AT NATURAL SMILES

DENTAL IMPLANTS

UNDERSTANDING YOUR TREATMENT

I.

WHAT IS THIS
TREATMENT?

A dental implant is a small titanium post placed precisely into your jaw, acting as a permanent new root for your replacement tooth. It bonds directly with your own bone through a natural process called osseointegration — creating a foundation that is stable, long-lasting, and entirely fixed.

II.

WHY IS IT BENEFICIAL?

Every day without a tooth, the jawbone beneath it slowly shrinks — a process that dentures and bridges cannot stop. Implants are the only solution that halts that bone loss, protects the teeth around the gap, and restores your bite with full, unrestricted function. They look, feel and behave exactly like natural teeth — because they are anchored in your bone just like natural teeth.

III.

WHAT YOU WALK OUT
WITH

A permanent, natural-looking tooth that is indistinguishable from those around it. Full chewing function restored. No gap, no compromise, no ongoing maintenance beyond normal brushing. Our patients consistently describe their implant as the tooth they forget is not their own.

YOUR TREATMENT JOURNEY

A SMILE, RESTORED

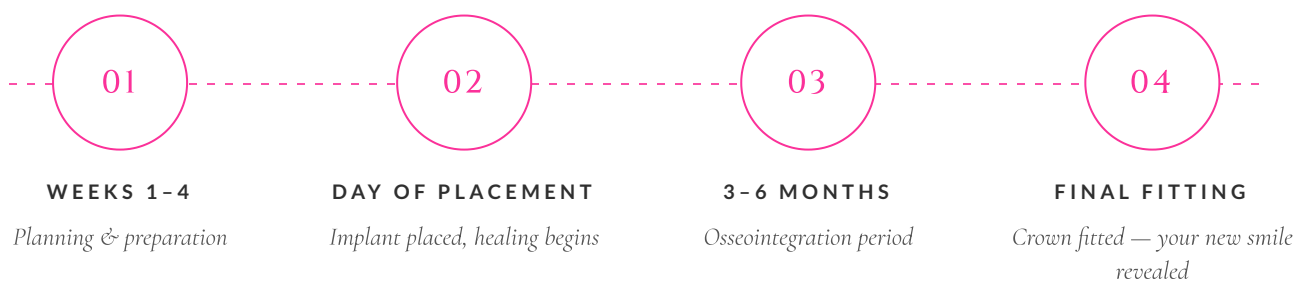

“The gap left by a missing tooth affects more than your smile — it affects what you eat, how you speak, and how you feel about yourself in company. Our patients tell us their implant gave them back all three.”

Your implant journey begins with a thorough examination and CBCT 3D scan — three-dimensional imaging that shows us your bone depth, density and anatomy in precise detail. This is what allows us to plan the exact position, angle and depth of your implant before the procedure begins. If a tooth extraction or bone graft is needed first, this is carried out as part of your plan and fully explained in advance.

Implant placement is a minor surgical procedure carried out under local anaesthetic — and the reality is almost always far more comfortable than patients expect. You will feel gentle pressure, but not pain. Mild tenderness for a few days afterwards is entirely normal and well-managed with over-the-counter pain relief. Most patients are back to normal within 48 hours.

Over the following months, your implant quietly bonds with your bone. A temporary restoration keeps you comfortable and confident throughout this period — you are never without a tooth. Once healing is confirmed, your final crown — individually crafted to match your natural teeth in colour, shape and proportion — is fitted. The moment it is placed is the moment most patients stop thinking about their missing tooth entirely.

TYPICAL TIMESCALES

CONSIDERED CARE, IN EVERY DETAIL

◆ EXPERIENCED IMPLANT TEAM

Our implant clinician has placed over 6,000 implants, bringing deep experience, precision planning and a calm, reassuring approach to every case — including those who have been anxious about dentistry for years.

◆ 3D PLANNING TECHNOLOGY

CBCT 3D scanning gives our team a complete picture of your bone before placement begins — ensuring your implant is positioned with surgical precision and the best possible chance of long-term success.

◆ PERSONALISED AFTERCARE

Your care does not end at placement. You receive a dedicated aftercare plan and direct access to our team throughout your healing period. Most questions are resolved with a simple phone call.

◆ PREMIUM MATERIALS

We use only clinically proven, high-quality implant systems with long-term track records of safety and success — the same systems used in specialist implant centres across Europe.

◆ TRANSPARENT PRICING

No hidden fees. Your detailed treatment plan is provided in writing before any commitment is made.

◆ FLEXIBLE FINANCE

Spread the cost of your implant with 0% interest-free finance. A permanent solution to tooth loss is often more affordable per month than people expect — ask us for a personalised quote.

WHAT OUR PATIENTS SAY

"I was terrified of the procedure but the team made me feel completely at ease. The results exceeded every expectation."

SARAH M. • PATIENT

"From the very first consultation, I knew I was in the right hands. I can eat, smile and laugh without a second thought."

JAMES T. • PATIENT

"The level of care throughout was exceptional. My confidence has been completely transformed. I cannot recommend Natural Smiles highly enough."

HELEN R. • PATIENT

YOUR APPOINTMENT JOURNEY

STEP BY STEP, AT YOUR PACE

NO.	APPOINTMENT	WHAT TO EXPECT	DURATION
1	NEW PATIENT EXAMINATION <i>Comprehensive assessment & 3D imaging</i>	A comprehensive oral health assessment with clinical photography and 3D CBCT scan. We discuss your goals, assess your bone, and begin designing your personalised implant plan. You leave knowing exactly what is involved and what it will cost.	60–90 MIN
2	TREATMENT PLANNING REVIEW <i>Plan presentation & consent</i>	We walk you through your detailed treatment plan step by step, answer every question, and ensure you feel completely informed and confident before anything is agreed. Finance arranged at this stage if required.	30–45 MIN
3	PREPARATORY TREATMENT <i>Extraction or bone graft if required</i>	Using your 3D scan, we plan each implant in its optimal position for both function and aesthetics. Any preparatory treatment — extraction, grafting — is completed to ensure the ideal site for placement. Every detail is managed before surgery day.	45–90 MIN
4	IMPLANT PLACEMENT <i>Surgical placement under local anaesthetic</i>	Your implant is placed under local anaesthetic with precision and care. The procedure is almost always more comfortable than patients anticipate. A healing cap or temporary restoration is fitted the same day, so you leave with your gap filled and your confidence intact.	90–120 MIN
5	HEALING REVIEW <i>Progress check at 6–8 weeks</i>	A brief but important check to confirm your implant is integrating well. For the vast majority of patients this is straightforward and reassuring. Once healing is confirmed, planning for your final crown begins immediately.	20–30 MIN
6	IMPRESSIONS & CROWN DESIGN <i>Precision moulding for your final crown</i>	Precise impressions or digital scans taken. Your bespoke crown is then crafted by our dental laboratory — colour-matched and shaped to blend seamlessly with the teeth around it.	45–60 MIN
7	CROWN PLACEMENT <i>Your final restoration is fitted</i>	Your completed crown is secured to the implant, checked meticulously for fit, bite and aesthetics — and your new smile is complete. Most patients describe this as the appointment they have been looking forward to since the very first consultation.	45–60 MIN

APPROXIMATE TREATMENT FEES

Single implant & crown	£2,700 – £3,200
Bone graft (if required)	£400 – £800
CBCT 3D scan	£150 – £250
