

TREATMENT AT NATURAL SMILES

PORCELAIN VENEERS & WHITENING

UNDERSTANDING YOUR TREATMENT

I.

WHAT IS THIS
TREATMENT?

Porcelain veneers are ultra-thin, bespoke shells of dental-grade ceramic bonded precisely to the front surfaces of your teeth. Each one is individually handcrafted by a master ceramist to match the exact shape, shade and translucency you and your clinician have designed together. The result is a complete smile transformation that looks, feels and functions entirely naturally.

II.

WHY IS IT BENEFICIAL?

Porcelain is the gold standard of smile design for good reason. It replicates the translucency and light-catching quality of natural enamel in a way no other material can match — which is why veneer results look indistinguishable from natural teeth. Porcelain is also highly stain-resistant, maintaining its lustre for years. With the right care, veneers last 10–15 years or more, making them one of the most cost-effective long-term cosmetic investments available.

III.

WHAT YOU WALK OUT
WITH

A complete smile transformation — symmetrical, luminous and entirely, unmistakably yours. Correcting colour, shape, size and proportion simultaneously, porcelain veneers deliver the kind of result that changes not just how you look in photographs, but how you feel walking into a room every single day.

SMILES CREATED

YOUR TREATMENT JOURNEY

A SMILE, RESTORED

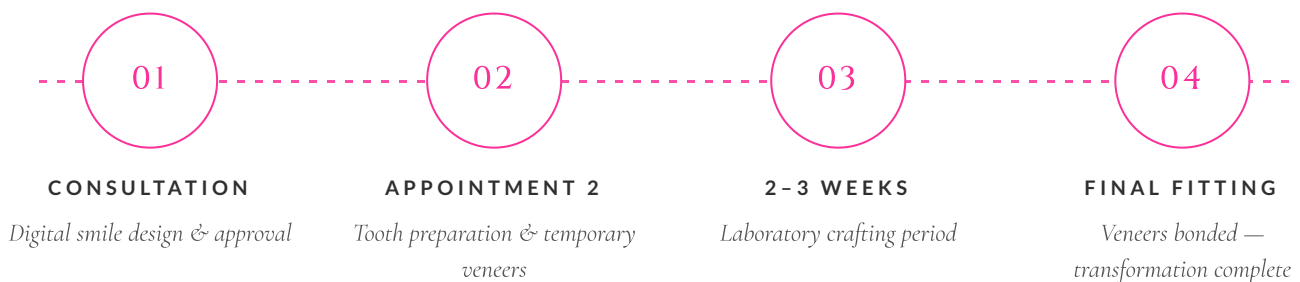

“The moment a patient sees their veneers for the first time is one of the most rewarding in cosmetic dentistry. We have seen people cry. We have seen people unable to stop smiling. What unites all of them is the same phrase: I wish I had done this years ago.”

Your journey begins with an in-depth smile design consultation. Using digital photography, facial analysis and smile design software, we design your veneers in close collaboration with you — refining the shape, size and shade until every detail is exactly right. You see and approve your complete design before a single tooth is touched. No assumptions are made.

A small amount of enamel is gently removed from the front of each tooth — typically less than 0.5mm, equivalent to the thickness of a contact lens. This is carefully planned in advance so the minimum necessary is removed. Impressions are taken and your veneers are sent to our dental laboratory to be handcrafted. Meanwhile, temporary veneers protect your teeth and give you a preview of your final smile.

At your fitting appointment, your completed veneers are trial-placed without adhesive so you can assess them in natural light and from every angle. Final refinements are made before anything is permanently bonded. Once you are completely satisfied, they are bonded with precision and polished to a beautiful, light-catching lustre. From consultation to completion: 3–6 weeks. A small wait for a result that lasts a lifetime.

TYPICAL TIMESCALES

CONSIDERED CARE, IN EVERY DETAIL

◆ MASTER CERAMIST CRAFTSMANSHIP

Every veneer is handcrafted at a specialist dental laboratory by ceramists whose entire practice is devoted to natural aesthetic restorations. Each shell is individually characterised — layered to replicate the depth, translucency and surface texture of real enamel.

◆ YOU APPROVE THE DESIGN FIRST

You see and approve every detail of your design before any treatment begins — the shape, the length, the shade, the symmetry. If anything does not feel right, we refine it. We never proceed until you are completely satisfied. Your veneers should be exactly what you imagined.

◆ TEMPORARY VENEERS THROUGHOUT

Temporary veneers are placed immediately after tooth preparation — so you never leave the practice without a beautiful smile. They protect your prepared teeth and give you a real-life preview of your final result while your permanent veneers are being crafted.

◆ STAIN-RESISTANT PORCELAIN

Porcelain resists staining far more effectively than composite resin or natural enamel. Your veneers will maintain their lustre and brightness through coffee, red wine and time — a quality of appearance that composite bonding simply cannot match over the long term.

◆ WHITENING INCLUDED

Professional whitening is completed before preparation begins, so your surrounding teeth are brought to their brightest natural shade. Your veneers are then colour-matched to complement this — ensuring a cohesive, radiant result across your entire smile.

◆ NIGHT GUARD PROTECTION

A custom-fitted night guard is included in your treatment as standard — not an optional extra. For patients who grind during sleep, this is the single most important thing you can do to protect your veneers and extend their lifespan significantly.

WHAT OUR PATIENTS SAY

★ ★ ★ ★ ★

"I was terrified of the procedure but the team made me feel completely at ease. The results exceeded every expectation."

SARAH M. • PATIENT

★ ★ ★ ★ ★

"From the very first consultation, I knew I was in the right hands. I can eat, smile and laugh without a second thought."

JAMES T. • PATIENT

★ ★ ★ ★ ★

"The level of care throughout was exceptional. My confidence has been completely transformed. I cannot recommend Natural Smiles highly enough."

HELEN R. • PATIENT

YOUR APPOINTMENT JOURNEY

STEP BY STEP, AT YOUR PACE

NO.	APPOINTMENT	WHAT TO EXPECT	DURATION
1	SMILE DESIGN CONSULTATION <i>Digital design & shade selection</i>	An in-depth consultation using facial photography, digital smile design and shade mapping. We work through every detail of your proposed result — shape, length, width, shade — until the design is exactly right. You approve every element before we proceed.	60–90 MIN
2	WHITENING — STAGE 1 <i>Take-home whitening trays fitted</i>	Bespoke whitening trays fabricated and provided. You whiten at home over 2–3 weeks to reach your ideal natural shade — the foundation against which your veneers will be precisely colour-matched. Starting here ensures the most cohesive, natural-looking result.	30–45 MIN
3	TOOTH PREPARATION <i>Minimal enamel removed & temporaries placed</i>	A fine layer of enamel removed under local anaesthetic — minimal, precise, carefully planned. Impressions taken and temporary veneers bonded immediately, so you leave with a beautiful, protected smile while your final veneers are crafted by our laboratory.	90–120 MIN
4	VENEER TRIAL FITTING <i>Final veneers trial-placed</i>	Your completed veneers are trial-placed without adhesive so you can assess them in natural light, from different angles, and in real-world conditions. This is your final opportunity to request any refinements. Nothing is bonded permanently until you are completely certain.	30–45 MIN
5	FINAL BONDING & COMPLETION <i>Veneers permanently bonded</i>	Your veneers are bonded permanently, one by one, with precision and care. Each is checked for fit, shade, bite and symmetry. Your smile is polished and revealed. This is the moment our patients tell us they will never forget.	60–90 MIN
6	REVIEW & NIGHT GUARD FITTING <i>Aftercare & long-term protection</i>	A 2-week review to confirm you are completely delighted with your result. Any micro-refinements made if needed. Your custom night guard is fitted — the investment in protection that keeps your veneers looking perfect for as long as possible. Long-term care guidance provided.	30–45 MIN

APPROXIMATE TREATMENT FEES

Single porcelain veneer	£900 – £1,300
Full smile (6 veneers) + whitening	£5,400 – £7,800
Full smile (8–10 veneers) + whitening	£7,200 – £12,000
Temporary veneers (2–3 weeks)	Included
Night guard protection	Included
